The Evaluator's Coming to Town

Oh! You better watch out,
You better not cry,
You better not pout,
I'm telling you why

The evaluator's coming to town

She's making a logic model,
She's checking it twice,
Once you meet her,
You realize she's nice

The evaluator's coming to town

She sees data you're keeping,
She knows the plans you make,
She knows if programs are bad or good,
(Most are good, for goodness sake!)

So…you better watch out
You better not cry,
You better not pout
I'm telling you why

The evaluator's coming to town

With little outputs
And little outcomes
Soon you will see
It really is fun.

The evaluator's coming to town

The people in your program
Will have a jubilee
They're gonna tell the funder
all the impacts that they see.

Oh! You better watch out
You better not cry,
You better not pout
I'm telling you why

The evaluator's coming to TOWN!
